MATERIALS

Stainless steel structure

Insulated Waterproof walls and roof

Water-repellent flooring integrated into the structure

TO DESIGN YOUR UNIVERSAL PUBLIC TOILET PROPERLY, you should consider:

- The target society and its cleaning habits
- Area to be covered (map)
- User profile and their physical conditions (adults, children, bathers, ostomates, mobility, vision, ...)
- The type of use to be offered (toilet, changing room, shower, ...)
- The location (urban, rustic, beach, public park...)
- Flow of expected visits (punctual, massive...)
- Surveillance in the area (day, night...)
- Water, sewerage, electricity networks available
